

# *News Article Sorting*

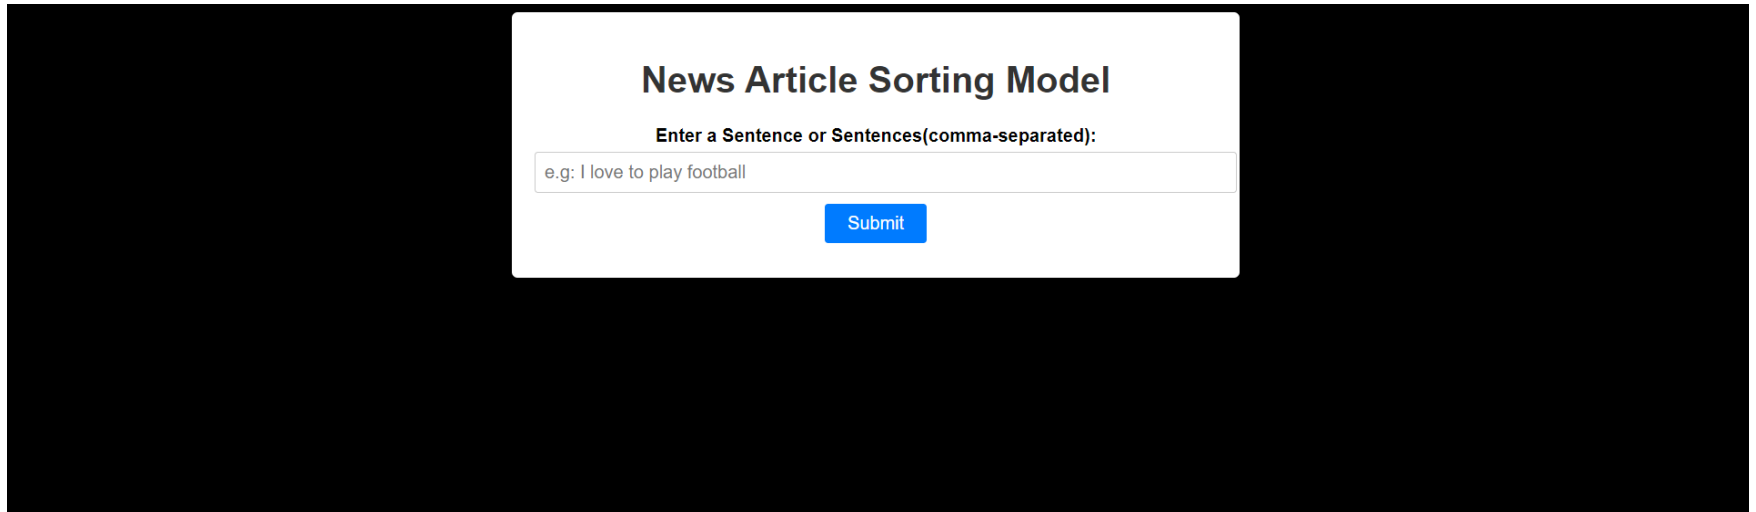

## *Wireframe Documentation*

Date Issued	Version	Description	Author
26-06-2023	1	Wireframe-V1.0	Ashwani Devi

# Homepage

We will have a single page UI which will facilitate bulk sorting of News Articles.

1. First thing anyone will see is a pop-up window on Homepage which will ask for inputs from the user.

The wireframe shows a dark gray background with a white rectangular pop-up window in the center. The window has a title, a label, a text input field, and a submit button.

**News Article Sorting Model**

Enter a Sentence or Sentences(comma-separated):

e.g: I love to play football

Submit

2. After filling out all the required inputs, the user has to click on the Submit button for the prediction of category. The predicted result will be shown below the Submit button on the Homepage.

### News Article Sorting Model

Enter a Sentence or Sentences(comma-separated):

e.g: I love to play football

Submit

**Prediction Results:**

Sentence	Prediction
["I love to play football"]	sport
"I watch tv"]	tech
